

WE PROUDLY PRESENT

NEW GRAVITY GEAR THE ELEVATED SOLUTION

Gravity Gear (Pty) Ltd proudly launched our very own new Gravity Gear yesterday and was able to not only present it to our staff but invited all our learners on training to join in the celebration.

The combination of arrangements to materialise this dream makes this event even bigger. During the second half of last year Gravity had the privilege of joining forces with a leading Work at Height Manufacturer to develop our OWN range of bags and FA kit products according to the needs and requirements of the African market. The advantages being that the products would be very competitively priced and of EN standards! Considering the time (which included to and thro of sending the samples back and forth, certification, production and shipping), and the effort that went into the development and certifying of the new range of PPE; we can honestly say it was a miracle after another, that brought us to where we can say today that we are privileged to have the PPE products in stock and ready to serve our customers with a truly great all-round PPE solution.

We thank you for your patience and support during this transition period and invite you all to join us in the excitement of this new adventure.
